

## Trays and Cup Carriers

Greenwave products are made from renewable resources including sugarcane, grass and reed plasma. These items are biodegradable within two weeks, waterproof, oil-proof, non-toxic and recyclable.

Huhtamaki's Rough Molded Fiber products use 100% pre or post consumer recycled newsprint, have 100% recovered fiber content and are processed chlorine free.

Evergreen's trays are made from a closed loop process which utilizes recycled polystyrene foam from school and institutional cafeterias. The used foam trays are processed into food grade polystyrene resin and blended with virgin resin and industrial recycled resin. This results in a PolyStyRecycle material, which is then used by designated manufacturers and turned into new food service products.

### Cup Carriers

| EBP Item Number  | Description                                       | MFG Number | Case Pack | UM | Color | Material or other information     |
|------------------|---|------------|-----------|----|-------|-----------------------------------|
| <b>Huhtamaki</b> |   |            |           |    |       |                                   |
| 078801786        | 1 cup carrier w/ tray 8-22oz cup, 13x10x2" White  | 20962      | 200       | CS | White | 100% pre or post consumer content |
